Document Imaging Scanners

Microtek® ArtixScan*DI*® 2010

Bring reliable color document imaging into your small office or workgroup at an affordable price.

Business today is no longer just boring black and white. Dynamic documents with color charts, photos and graphics are the current standard, so when going from paper to digital, black and white may be an incomplete solution. The Microtek ArtixScanDI 2010 offers high 600- dpi optical resolution and 48-bit color depth to ensure that your scans will retain all the detail and color fidelity present in the originals. Sometimes shades of gray don't tell the whole story. Take it from a company that has been producing industry-leading photo scanners for years. We know color and we're bringing our experience with us. At 20 pages per minute, the ArtixScanDI 2010 offers an affordable and easy-to-use entry into document imaging for your small office or workgroup.

Effortless multipage scanning

- 20 pmm—thousands of documents daily
- 50-page automatic document feeder (ADF) minimizes reloading to increase efficiency
